STAR Survey for **Issue 2.1: Vocabulary that Works!**

Watch the STAR video at www.ctecaac.org/star and then answer these questions:

In this video STARs are introduced to promoting personally meaningful vocabulary so that AAC users can say what they want to say.
Please answer the following questions.

* 1. Identify different ways vocabulary can be presented for someone with CCN (Check all that apply).

- [ ] multi word messages pre-stored for fast retrieval.
- [ ] single word messages with icons.
- [ ] single word messages with test only.
- [ ] vocabulary in categories or topics.
- [ ] Core and fringe words together for combining words or concepts.
- [ ] The video did NOT show any vocabulary.

2. It is a good idea to start with a board that has just pictures of things. True or False?

- ( ) True. It's ALWAYS better to have simple vocabulary that matches the object they are requesting.
- ( ) False. Having just a list of things can be limiting.
- ( ) I have no idea.

* 3. Why is it important to have an individualized AAC evaluation for persons with CCN?

- ( ) So you do not forget who you are evaluating.
- ( ) Augmentative and Alternative Communication, or AAC for short, includes a lot of different strategies and systems for individuals with CCN. THere is a lot to consider!
- ( ) It really isn't that important.

* 4. I feel this video was... (Check all that apply)

- [ ] Helpful! I learned something new!
- [ ] Awesome! I will use this information right away.
- [ ] Insightful. This information was applicable to someone I know
- [ ] Bad. This information was NOT helpful.
- [ ] Disappointing. I do not agree with the information in this video.
- [ ] Interesting. The video contained information that was interesting but not applicable to anyone I know.

5. Here is a place to provide feedback on this S.T.A.R. video.
